

## Room for innovators

There are several opportunities for incubation which cater to cleantech companies in Greater Copenhagen. The most important of these are described below.

### SCION DTU

Scion DTU is an international science park which helps individuals and companies create, realise and commercialise their high-tech ideas. Scion DTU helps create the setting for growth by providing access to facilities, services, consultancy, and professional networks. Scion DTU works in the field of biotechnology, nanotechnology, environmental technology, medico, IT development and other high-tech sectors.

### SYMBION

Symbion is the largest science park in Denmark. It provides a dynamic environment where research meets commerce. Symbion's mission is to help commercialise innovative and high-tech projects in the fields of IT, telecommunication, biotech, pharmaceuticals, medtech and cleantech. Symbion provides access to consultancy and finance, useful knowledge about capital, and an extensive and relevant company network.

### DTU SYMBION INNOVATION (DSI)

DSI finances and assists competent entrepreneurs in developing technological and biotechnological companies of the future. The organisation also caters for companies looking for venture capital for the development of their business.

### CAT SCIENCE

The science park CAT is a privately-owned company, which helps entrepreneurs and innovators find the capital and competences required to turn ideas into business reality. CAT is a unique combination of government-backed, pre-seed capital, a science park and a venture company. It works both as host and a mentor for business ideas.
